IPC

IPC's Assurance

Compliance in global financial trading has never been more challenging. Organizations face increasing regulatory demands while managing complex communication infrastructures.

We help businesses navigate regulatory challenges whilst improving operational resilience and efficiency.

Key benefits

1. Assured Compliance & Audit readiness

- Resolve compliance gaps, ensure full data capture and simplify audits with exportable reports. IPC's Assurance automates regulatory verification with real-time monitoring and dashboards.

2. Policy Verification

- Regularly verify and monitor the implementation of your compliance policy and retention to ensure they are being adhered to correctly. Promptly flag any violations and ensure that all regulatory interactions are managed in accordance with best practices.

3. Automate Testing

- Trade Floor System Check (TFSC) automated end-to-end testing for the capture and archiving of regulated interactions, which can be executed on a scheduled or ad-hoc basis. This system check will provide 'Ready for Service' reports and ensure post-maintenance system integrity.

Why Choose IPC's Assurance Services?

IPC delivers a future-ready approach to assured communications compliance and optimised telephony and voice recording system performance.

- **IPC delivers a future-ready approach** to assured communications compliance and optimised telephony and voice recording system performance.
