

IPC Agility

IPC

A Transformational Solution working in concert with Unigy & Connexus

Solution Sheet

IPC Agility

- Enabling Digital Transformation in high and low touch trading
- Accelerating Innovation and technology adoption
- Empowering Interoperability and complex collaboration
- Creating Efficiency at scale in a rapidly evolving market

IPC Agility is a Transformational Application Platform that works with Unigy and Connexus to provide customers with more flexibility with reduced risk.

IPC Agility is the direct result of IPC's continued "API First" philosophy to enable open platforms, new technology paradigms and drive efficiencies.

IPC Agility enables the power of containerized or virtualized applications and tools that can be deployed in parallel with Unigy and reduces development and deployment times while ensuring stability of the trading system.

Supported by Connexus Cloud, **IPC Agility** can also enable services across IPC's wide eco-system of Partners and expansive community.

IPC Agility Benefits

Quicker adoption of new technologies and tools

- Decoupled from Unigy releases, customers can more rapidly and safely adopt complementary solutions and tools

Simplified deployment with minimized risk

- IPC Agility is an application platform for tools and applications developed by IPC, Partners or customer home grown minimizing Unigy upgrades

Increased Access Options

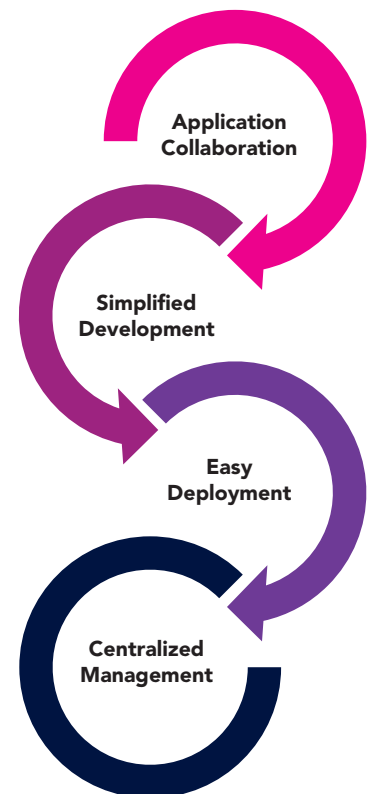

- IPC Agility enables access options for soft client, mobile and community integrations

Secure, customer defined connectivity and access to data and services

- With Connexus Cloud, applications can benefit from Connexus community and IPC support
- Customer can define remote access and support definitions and enforce security policies

Enabling new solutions alongside mission-critical trading infrastructure

- IPC Agility facilitates customer to adopt new solutions quicker and with less risk

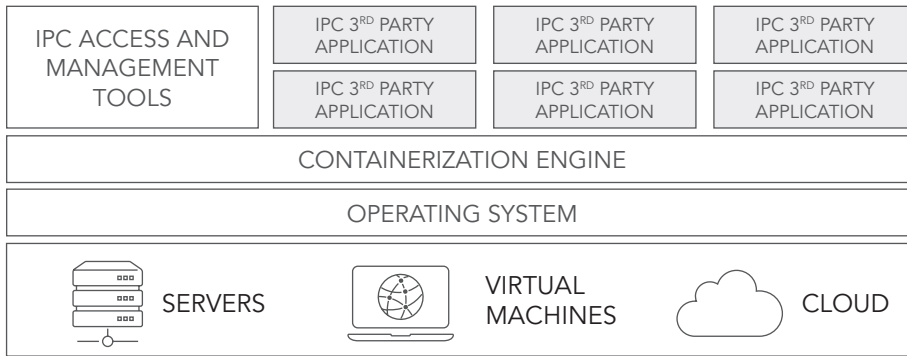

IPC Agility

Agility Application Containers & Virtual Machines

Agility Application Containers:

- Enable application independency and separation from Unigy with far less overhead and much more flexibility.
- Reshape the way IPC, partners and clients think about developing and deploying application software as companion to Unigy and facilitated by Connexus.
- Enable applications to be packaged into separate containers and deployed across physical / virtual machines or cloud environments.

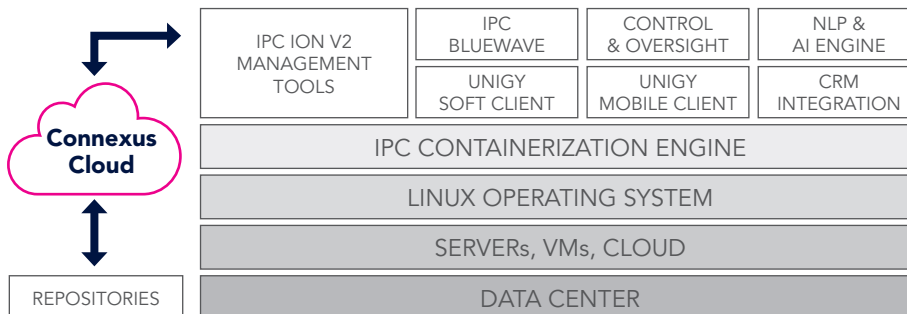

Agility's architecture includes tools that automate the deployment, management, scaling, networking, and availability of container-based applications. **Virtual Machines** can also be available for IPC, partner or client applications that are not containerized.

Unified Service Platform

Decouples new Product Releases from Standard Unigy Development Cycles

- Highly secure remote access via ION v2 & Connexus Cloud
- Connexus Ecosystem Integration
- Built on multiple 'state of the art' technologies
- Supports IPC, partner and client developed applications
- Simplifies deployment of apps, tools and analytics
- Automation and Orchestration Capabilities

About IPC

IPC is a technology and service leader that powers financial markets globally. We help clients anticipate change and solve problems, setting the standard with industry expertise, exceptional service and comprehensive technology. With customers first and always, we collaborate with each to understand their individual needs to help make them secure, productive and compliant within our connected community. Through service excellence, long-developed expertise and a focus on innovation and community, we provide agile and efficient ways for our customers to accelerate their ability to adapt to the ever-changing requirements for advanced data networks, compliance and collaboration with all counter-parties across the financial markets.
