

IPC Market Data Capabilities

Facilitating all of your network needs

IPC's low latency network infrastructure provides a solution for clients to gain access to market data and order entry gateways at key liquidity venues and exchanges through connectivity designed for the financial industry.

Over 50 Years of Service Excellence:

IPC has operated for over 50 years as a specialized provider of communication and network services to the financial markets. Through IPC, clients will gain access to the largest global ecosystem of capital market participants, that interconnects more than 7,000 participants across 750 cities in over 60 countries.

Ecosystem

The IPC ecosystem provides the ability to reach key parties throughout the trade lifecycle. From buy-side or sell-side firms, trading platforms, market centers, liquidity venues, interdealer brokers, market data providers, or clearing/settlement services, IPC brings together all of these entities through a single point of contact.

IPC Solutions

Our solutions enable clients to connect directly to exchanges for order flow and market data on a local and international scale. IPC provides managed colocation & hosting services, allowing access to market data from major liquidity venues and exchanges globally. Not only will our solutions enable access to the data to optimize electronic trading but will aid in meeting business requirements for risk management and post trade compliance. By partnering with IPC, we can allow your organization to dedicate resources to support traders, strategists, and quantitative researchers. This enables customers to focus on, identify, and analyse market trends to gain a competitive advantage.

Global Connectivity Solutions

Managing and paying for dedicated exchange connectivity can be costly, difficult to administer, and create additional strain on your business. **IPC offer a tailored solution** that will ensure the lowest latency exchange connectivity, backed by a global team of experts who will manage the maintenance of your network, and liaise with exchanges on your behalf and alleviate the hassle of going direct.

Our Position

Our position as a global network services provider means IPC can act as a single source provider of connectivity services in acquiring market data. In this, we aid our clients in significantly reducing the cost and complexity of consuming multiple exchange feeds from multiple vendors. Coupled with this are the benefits of reducing the costs of maintaining in-house systems needed to connect directly to exchanges. This allows for our clients gain the advantage of reducing the time spent maintaining your infrastructure and focus on acquiring the data needed to support their commercial objectives.

IPC has extensive experience in managing multicast market data services, serving the needs of OPRA, CTA, and many major exchanges, and can manage these services on behalf of our customers. By combining our connectivity and cloud solutions, clients will be able to access key market data sets across your organisation through a network designed and optimised for participants in the capital markets.

IPC is able to provide a scalable solution with ever-expanding bandwidth requirements. From a single fully resilient and managed connection to the IPC network, firms can access multiple exchanges and market data providers through a flexible solution tailored to your business needs.

IPC is a technology and service leader powering global financial markets.

We help clients anticipate change and solve problems, setting the standard with industry expertise, exceptional service and comprehensive technology. With a customer-first mentality, IPC brings together one of the largest and most diverse global financial ecosystems spanning all asset classes and market participants.

As the enabler of this ecosystem, IPC empowers the community to interact, transact and react to market changes and challenges, and we collaborate with our customers to help make them secure, productive, compliant and connected.
