

# Unigy® Pulse

## The device that ties it all together

### Integrated and Innovative

Having hoot and intercom for instant trading collaboration has never been easier – or more integrated.

Now traders, back and middle office users can have instantaneous and seamless access to each other to keep communications flowing, reduce risk and improve compliance.

**Unigy Pulse** – the compact device from IPC®, and part of our instant trading collaboration solutions – is “built from the ground up” to support back and middle office personnel using the Unigy platform. It’s not only for hoot and intercom, but also for the TV audio, Dial Tone and speaker channels required for today’s complex financial environments.

#### Key benefits include:

- Extends existing Unigy infrastructure to all regulated users
- Speeds up communications – so deals get done faster and more accurately
- Simplifies infrastructure – everything integrated on a single state-of-the-art system
- Ensure an integrated, secure, compliant and economical trader-voice solution beyond the turret

**Unigy Pulse** — “built from the ground up” to support back and middle office personnel using the Unigy platform

#### Benefit from ROI:

#### Simplified administration and maintenance

**IT managers** – along with the CIO and CFO – will like Unigy Pulse as much if not more than the users themselves.

**Why?** Because Pulse provides an immediate return on investment and is a core component of the Unigy platform. You don’t have to add back room hardware to benefit from Pulse’s advantages. In fact, you can eliminate third-party equipment in the back room and at a trader’s desk.

Consolidate both system administration and maintenance through a single solution provider and reduce related costs. The savings lets you apply your limited IT resources to other business priorities.

## With Unigy Pulse, Trading teams can customize for greater productivity

### Why Unigy Pulse?

- Always Available – With Unigy Pulse, applications will always be ready to use, whether on a desktop, laptop or any mobile device
- Integrated End Points – Unigy Pulse enables users to leverage the same Unigy back end infrastructure as trading teams
- Secure and Compliant – Utilise existing VR solutions and extend compliant connectivity to all regulated users through Unigy Pulse
- Extend Trader Voice Reach – Unigy Pulse will offer not only private lines to non-trading users, but dial-tine, ICM, Speaker access and more

### Look at the many advantages built into every Unigy Pulse device:

- 4 or 8 speakers configuration
- Highly extensible touch screen for future apps
- Gigabit Ethernet with pass through for additional device connectivity
- Same integrated, unlimited directories as IPC's industry-leading Unigy Trading System
- Speaker replay with 20-second playback
- Customizable favorites and speaker channels
- Gooseneck microphone with LED latch indication

### IT can unify system management and streamline deployment

- Eliminating third-party back room equipment is just the start. Unigy Pulse helps streamline deployments by supporting:
- Power over Ethernet – eliminates need for local power
- Dual Ethernet Ports – so a single Ethernet cable can be shared with the PC or PBX phone
- Reduced Desktop Footprint

# About IPC

**IPC is a technology and service leader powering global financial markets.**

We help clients anticipate change and solve problems, setting the standard with industry expertise, exceptional service and comprehensive technology. With a customer-first mentality, IPC brings together one of the largest and most diverse global financial ecosystems spanning all asset classes and market participants.

As the enabler of this ecosystem, IPC empowers the community to interact, transact and react to market changes and challenges, and we collaborate with our customers to help make them secure, productive, compliant and connected.
